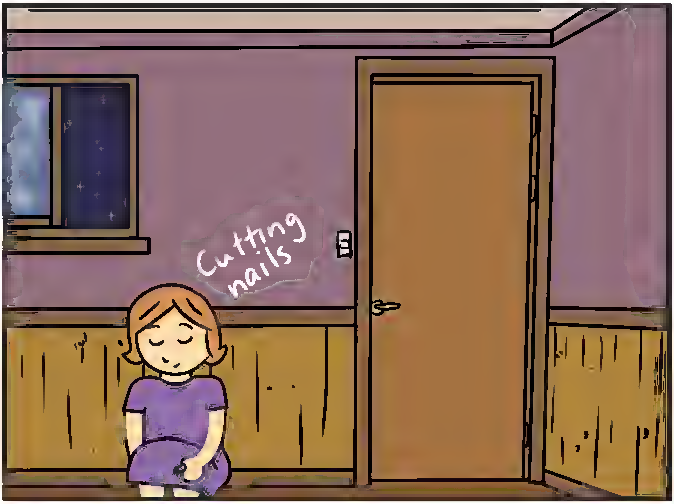
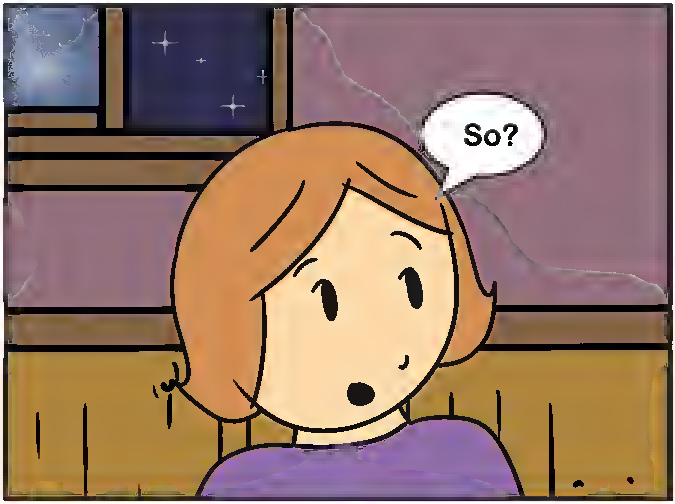
NICHOLALALA



Cutting nails

You shouldn't do that at night. Don't cut your nails after the sun has gone down
Why?

Because of what can happen!
If you cut your nails at night and throw them out, a mouse might eat them.



So?

Then they have part of your soul!
They can turn into a copy of you.

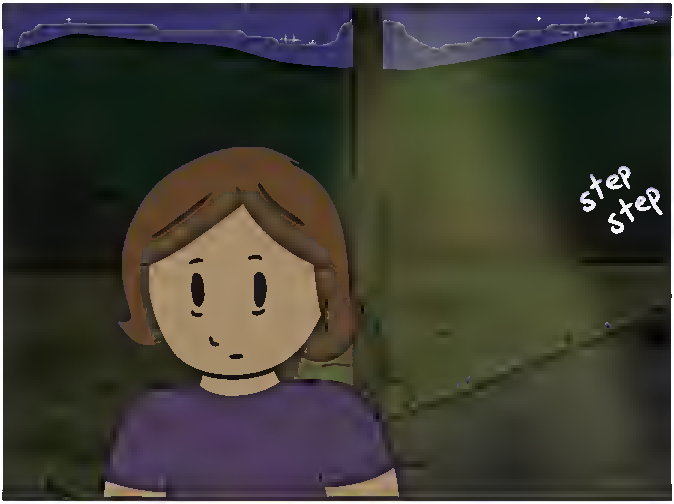
You'll start to hear footsteps behind you. And when you turn, there will be something that looks exactly like you! They want to take your place.

Okay, okay,
that sounds stupid.

I'm Australian, not Korean.
Nothing is gonna happen.

The next night

Footsteps



step
step

To be continued...
